The professional dent removal system sets standards in ease of use without making compromises in cost

Art.-N° 351001

With the AIRPULLER AP 95 you can do all the dent repairs from the outside in a fraction of the time that is normally needed when using existing tools. For example:

- on hail damage
- little dents
- on double-sided car body areas
- for panel shrinking

Even panel shrinking of so-called "highspots" is no problem with the AIRPULLER AP 95.

Delivery Contents:

AIRPULLER AP 95
in its individual case
The basic accessory kit
Multi-lingual operating
instructions

Accessory:

Transformer
Set with 6 electrodes
Diamond file
Powerlift
Maxilift
MC 95 Magnetic earth clamp

Technical data:

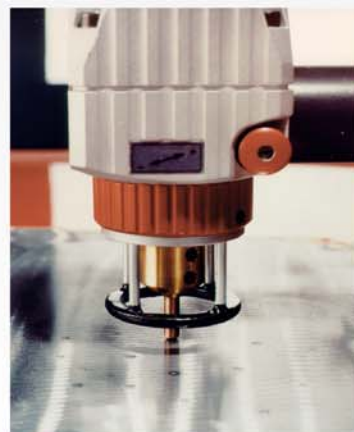

Air pressure: 6 - 8 bar
Measures: 190 x 170 x 80 mm
Weight: 1,8 kg

From now on, frightening hail damage on car roofs can be removed without any problem. You will not have to spend time on expensive preparations or on removing the inside trimmings.

The AIRPULLER is so simple to use, you can use it immediately without any special training, and you will see how clever it is when removing long scratches and scrapes on the side panels of cars.

AIRPULLER AP 95 can be supplied with its own special control unit or you may use the InvertaSpot ATS/ATM/ATL or other similar products.
