# AHS ■ AXLE TESTER

## ■ Clear

Test results at one look. The control cabinet for the axle tester includes a digital display, control lights and symbols as well as protocol printer [option].

## ■ Ideal

The workshop righteous AHS axle tester is reliable in service and easy to assemble.

## ■ Optimal

Plastic corundum has a hardness of 9 (according to the Mohs table). As comparison: diamond has a hardness of 10. No wonder that the coating of the AHS test plate has an extraordinary long life, it also ensures an optimal power transmission.

### Standard equipment:

- test plate
- 5 m connecting cable [AT 1002]
- 10 m connecting cable [AT 5002]
- control cabinet with signal lamp and large digital display

### Option:

- drive-on ramps
- fixed base column
- mounting frame
- connection cable per meter
- galvanizing costs mounting frame
- wall mount
- protocol printer

### Technical data:

AHS Axle tester:	AT 1002:	AT 5002:	
max. axle load	4000	13000	kg
length without ramps	1000	1000	mm
length with ramps	2000	2000	mm
width	2320	600	mm
height	55	55	mm
<b>Display:</b>			
width	600	600	mm
height	400	400	mm
depth	230	230	mm
